

MATLAB Intro, 22 - 24 July 2013, Prof. Dr. Thomas Slawig	
Participants	9
No. of Questionairs	7
Which themes were the most important for you?	Almost all themes How to optimize my scripts; How to manage the plots; How to open, write and save data Function and loops Functions & vector & matrix operations; Loops & how to load own data; Plots (2D & 3D) All of them but plotting most Get an overview of MATLAB, where to find what Function parts and plotting
- were least important for you?	How to control the label and ... in the plots, because it was not new for me Movie making Movies
- would you like dealt with in more detail?	Statistical toolbox Toolbox, a general overview to the most common ones The plotting start was a little bit too fast Yes but after some time for practicing first
Other Comments:	Very good course, for everyone who had never worked with MATLAB I would also like to participate on an advance level of MATLAB; In addition, the lecturer was quite helpful Well done!!
